PROFESSIONAL SUMMARY

Senior **Angular** Developer (7+ years) with a track record of owning frontend architecture end-to-end — including restructuring application and component architecture, adopted team-wide, and establishing reusable patterns. Full-stack with **NestJS**/**TypeScript** for API development. Acts as the team's technical point of contact: reviewing code, unblocking dependencies, and mentoring engineers beyond individual feature delivery.

TECHNICAL SKILLS

Web Technologies: JavaScript, TypeScript, HTML, CSS/SCSS, Tailwind CSS, jQuery, PrimeNG, NgRx

Frameworks: Angular, NestJS, Ionic, CodeIgniter

Databases: Firebase Realtime Database, MySQL

Tools & Practices: Claude code, Git, Figma, Agile/Scrum, UI/UX

PROFESSIONAL EXPERIENCE

Consultant — Capgemini - Mar 2023 – July 2026

- Developed a skill management application to help identify and address skill gaps within the organization.
- Owned end-to-end development of key application features using Angular 18, TypeScript and Angular Material, from requirement analysis through implementation and integration.
- Designed scalable and reusable UI components based on client requirements, improving consistency and maintainability across application modules.
- Developed and integrated RESTful APIs using NestJS, implementing validation, error handling, and seamless communication between frontend and backend services.
- Identified and resolved frontend performance issues through appropriate Angular optimization techniques.
- Mentored junior developers through technical guidance, debugging support, code reviews and knowledge-sharing sessions.
- Participated in code reviews to enforce coding standards and improve overall code quality.

Technologies: *Angular 19, Angular Material, NgRx, NestJS*

Angular Developer — Infospica - Sep 2021 – Mar 2023

- Built an integrated intake system to record client cases and efficiently assign cases to available attorneys.
- Integrated a calendar component library supporting month, week, and day views.
- Created reusable custom components and implemented custom form validations.
- Developed Govlink, the official application for filing surprise billing claims for the State of Georgia.
- Implemented custom validations and reusable components, and managed application state using NgRx.

Technologies: *Angular 12/13, PrimeNG, PrimeFlex, NgRx, Angular Material, SCSS*

Software Engineer — Abeyaantrix Solutions - Nov 2020 – Aug 2021

- Built a tax filing application (Australia DIY) enabling Australian citizens to file their taxes online.
- Developed highly reusable components used across multiple pages of the application.
- Applied the facade pattern to integrate backend APIs and manage client-side state using observables.

Technologies: *Angular 10, Tailwind CSS, Angular Material, SCSS*

Angular Developer — Galtech Technologies - Apr 2019 – Aug 2019

- Developed SK-ERP, an inventory management solution for a Dubai-based explosives and demolition services subsidiary.
- Built the login module and a module for recording incoming inventory materials.
- Integrated Firebase for database connectivity and data operations.

Technologies: *Angular 7, Firebase, Ionic 3*

Web Developer — Annvision Solutions - Oct 2017 – Mar 2019

- Designed and developed Punarvivaham, a matrimonial website for divorcees, including user registration, login, and admin panel functionality.
- Integrated the PayUmoney payment gateway to support online transactions.
- Developed three job portal websites (Evanios Jobs, Edu-Masters Job Services, Jobs Divine) in core PHP, building user and employer registration and resume collection.
- Built an admin panel supporting multiple user roles and redesigned key pages to improve usability.

Technologies: *PHP, CodeIgniter, jQuery*

ADDITIONAL PROJECTS

Quarantine Help (Open Source)

- Contributed to a hybrid mobile application (Android and web) that helps people find assistance while in quarantine.
- Developed key frontend UI components and integrated APIs.

Technologies: *Angular 8, Ionic 5*

EDUCATION

B.Tech, Computer Science & Engineering — Sahrdaya College of Engineering & Technology (2012 – 2016)
